

# Microsoft Project

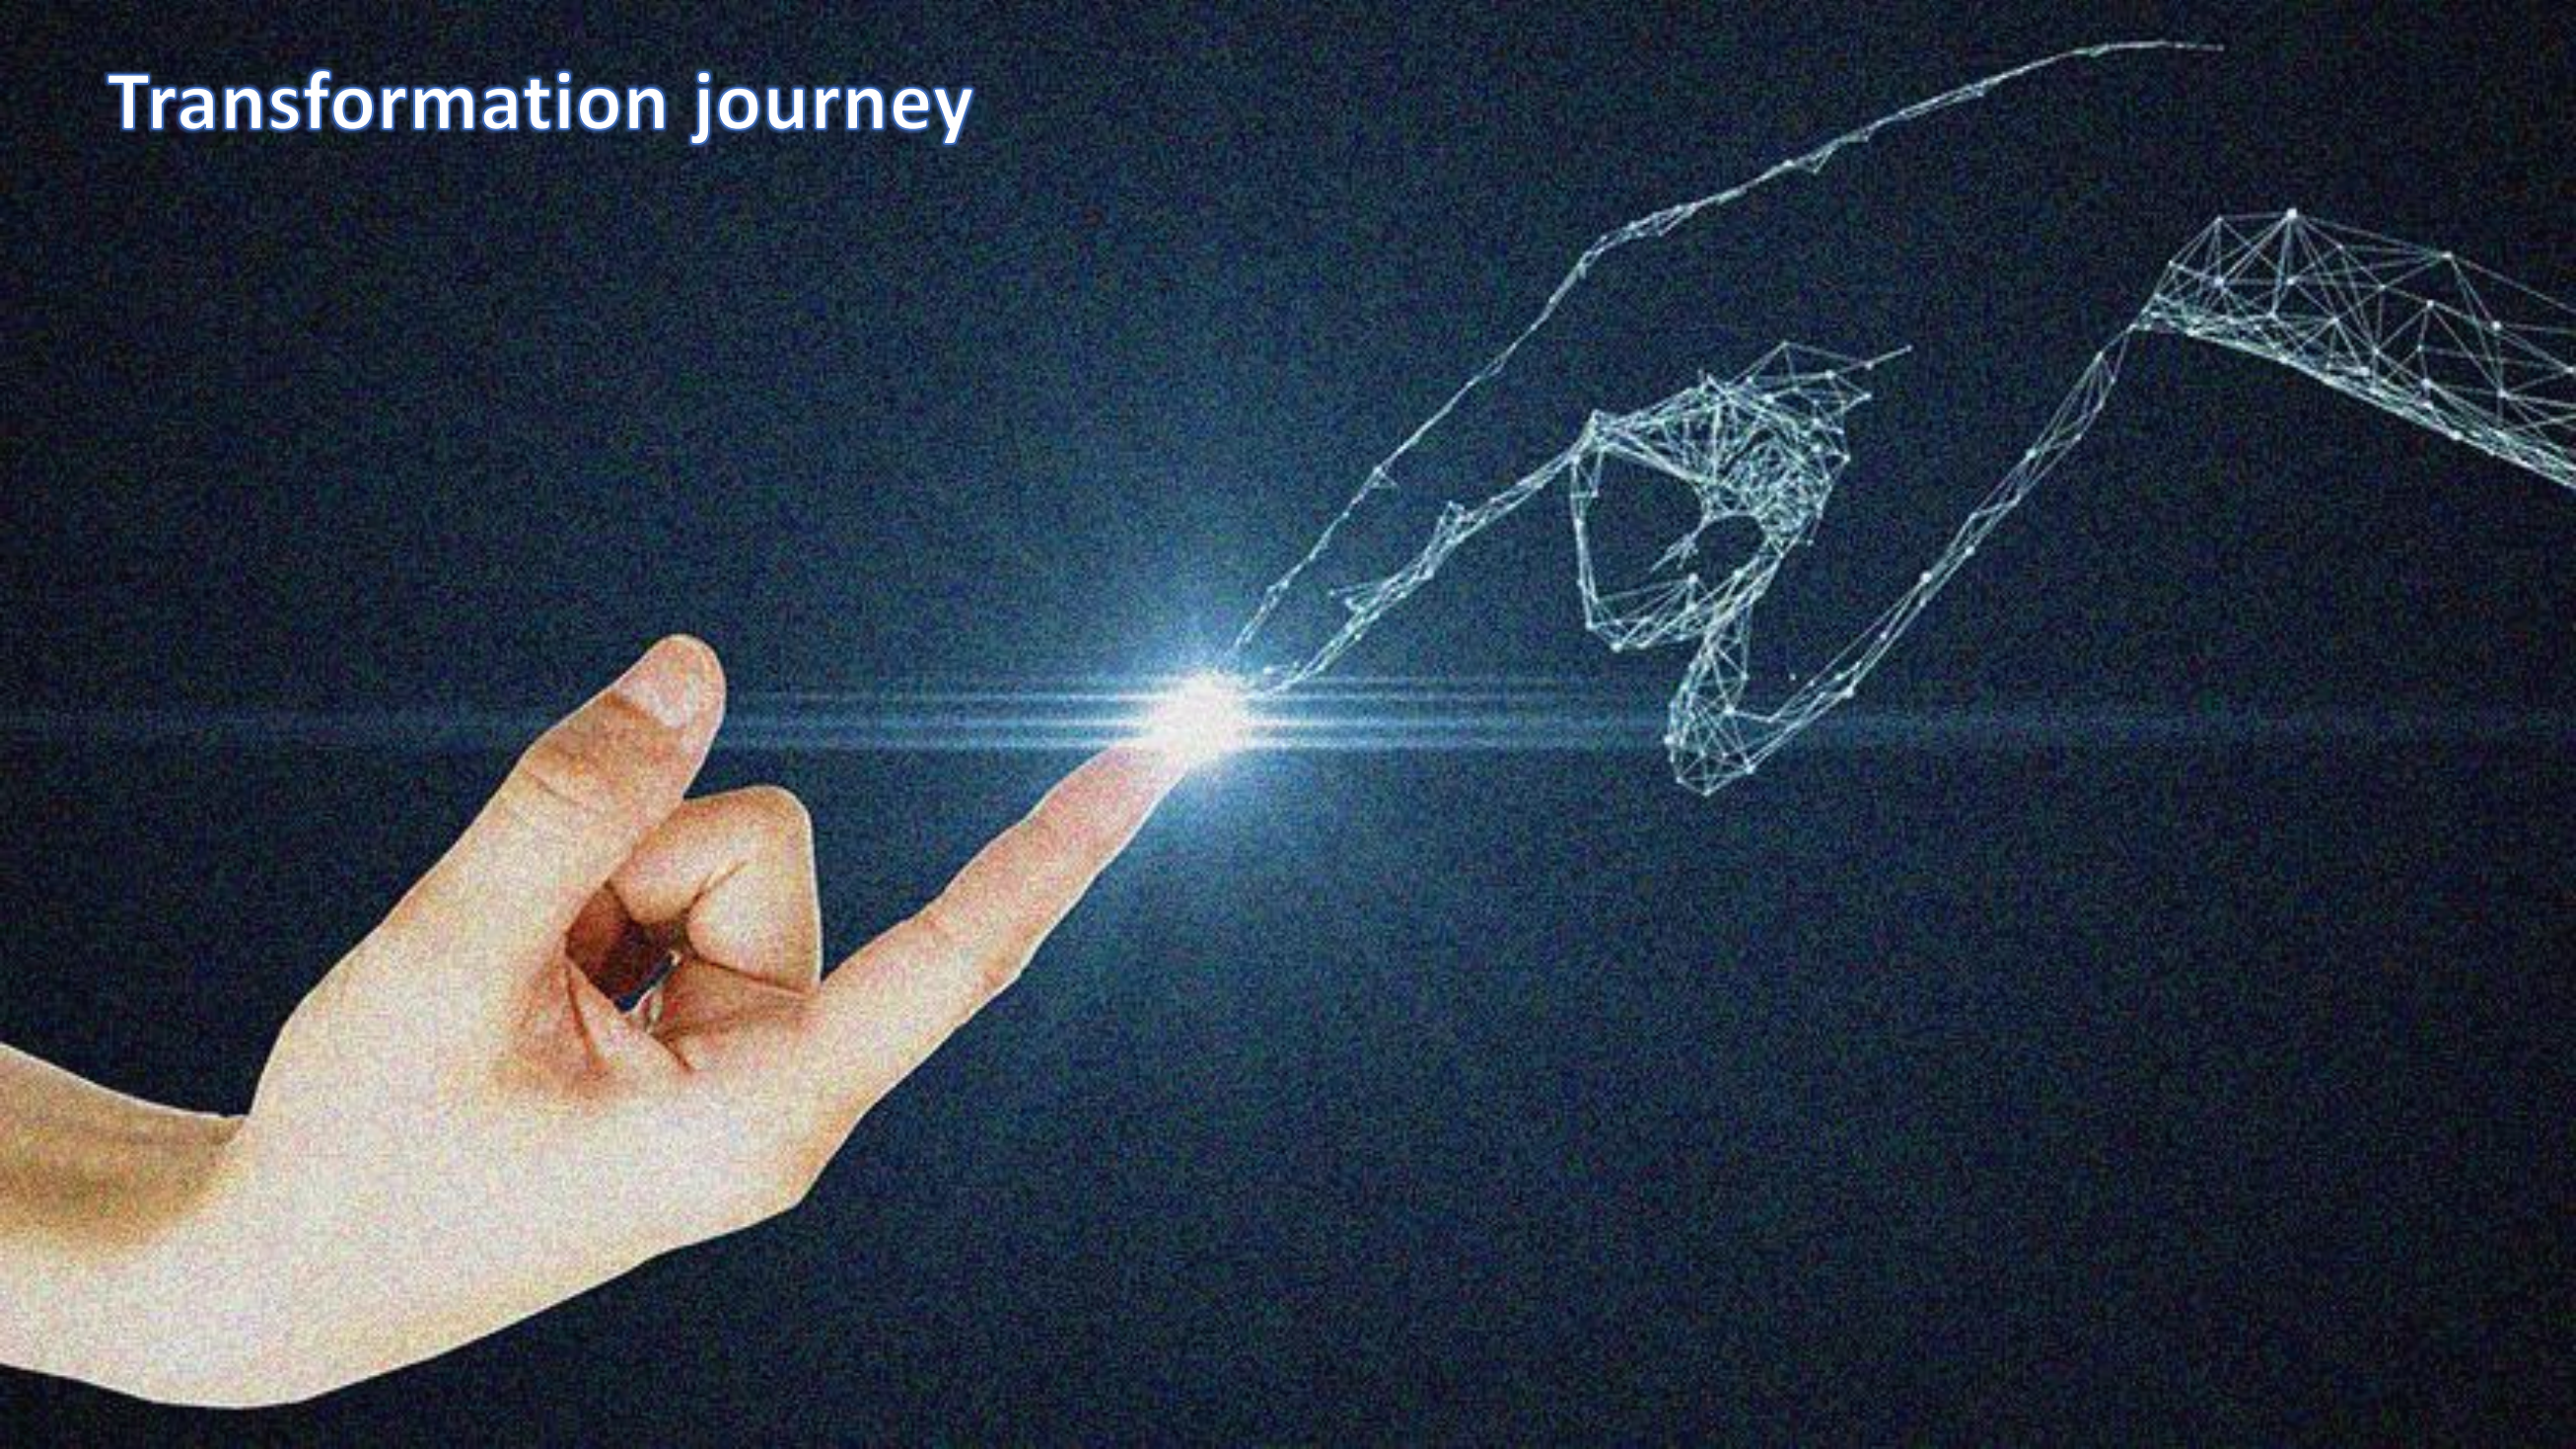

## Continuous momentum

Michael Fukuda  
PPM Director – Latin America

# Transformation journey

# Change is everywhere ...

- Globalization of employment
- Globalization of consumption
- Millennial
- Population Aging
- Inequality growth
- Climate change
- Urbanization
- Health and life expectancy
- Customization in scale

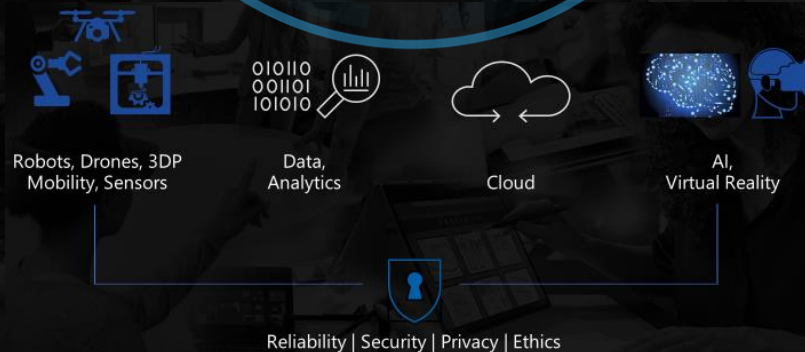

Demographic  
and social  
transformation

Business  
and political  
transformation

We  
are  
here

Technology  
transformation

- Reputation vulnerability
- Transparency
- Customer power of choice
- Globalization of competition
- Globalization of customers
- Increase of populism
- Increase of nationalism
- China and India
- Regulation
- Value chain disruption

2005

2013

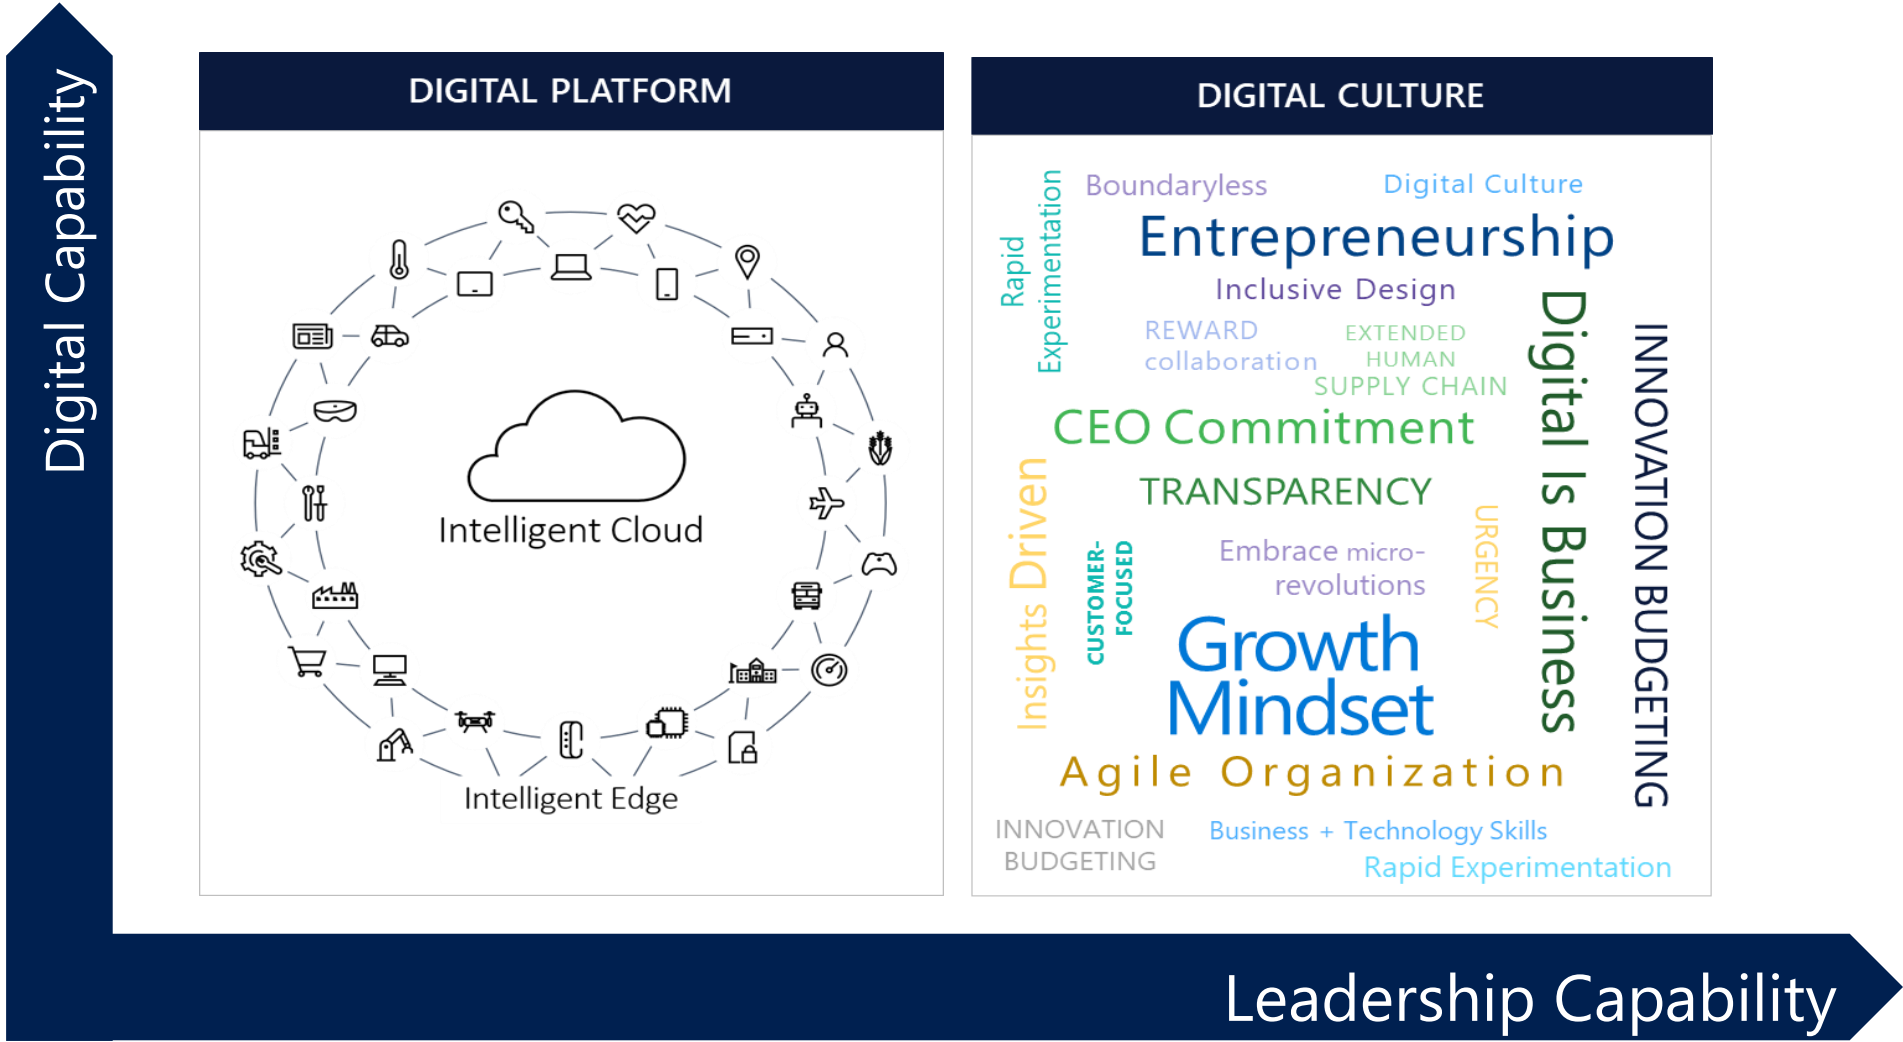

## How do we start ?

# The roadmap to transformation

## **1 Dream**

Imagine and envision the art of the possible

## **2 Design**

Design to realize the value of the vision

## **3 Deliver**

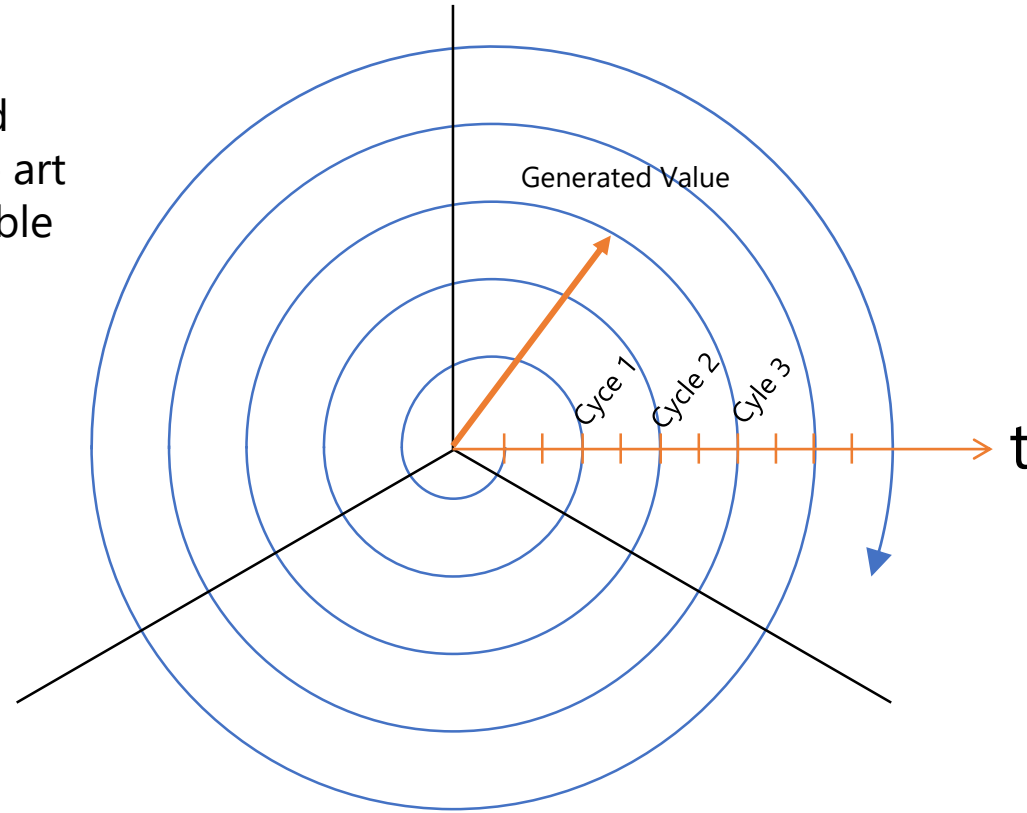

Deliver, adopt and realize the vision and value

## 1 Dream

Imagine and envision the art of the possible

## 2 Design

Design to realize the value of the vision

## 3 Deliver

Deliver, adopt and realize the vision and value

Dream

Customer  
defines value

“

*Every company is a software company.*

*You have to start thinking and  
operating like a digital company.*

*It's no longer just about procuring one  
solution and deploying one. It is not  
about one simple software solution.*

*It's really you yourself thinking of your  
own future as a digital company.* ”

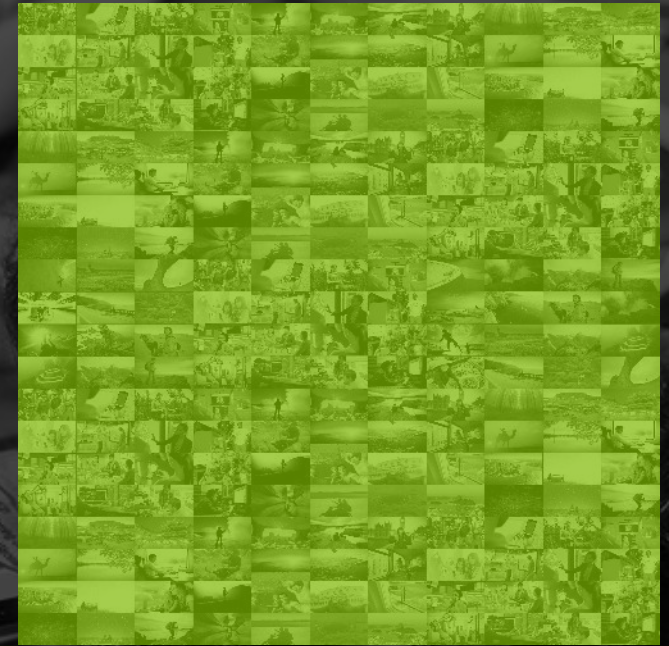

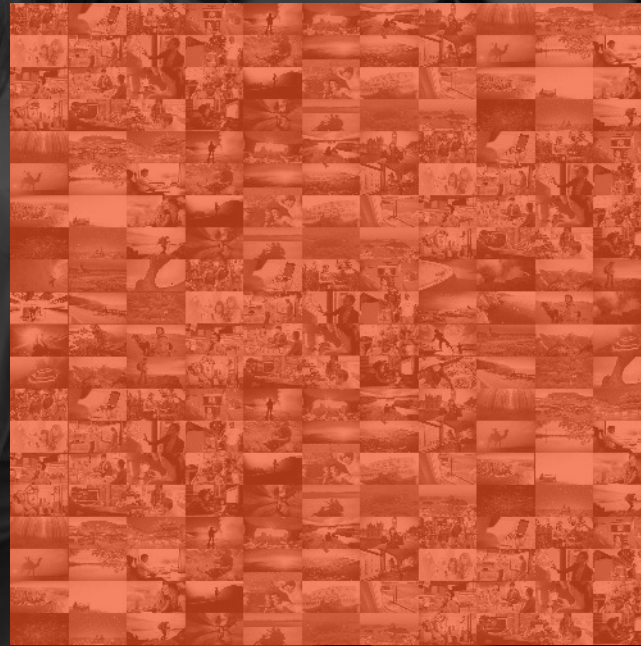

*Satya Nadella, CEO, Microsoft*

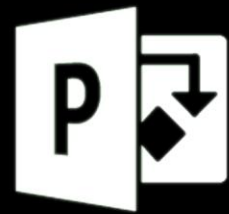

# Microsoft mission

Empower every person and  
every organization on the  
planet to achieve more

# Meet Project

... again

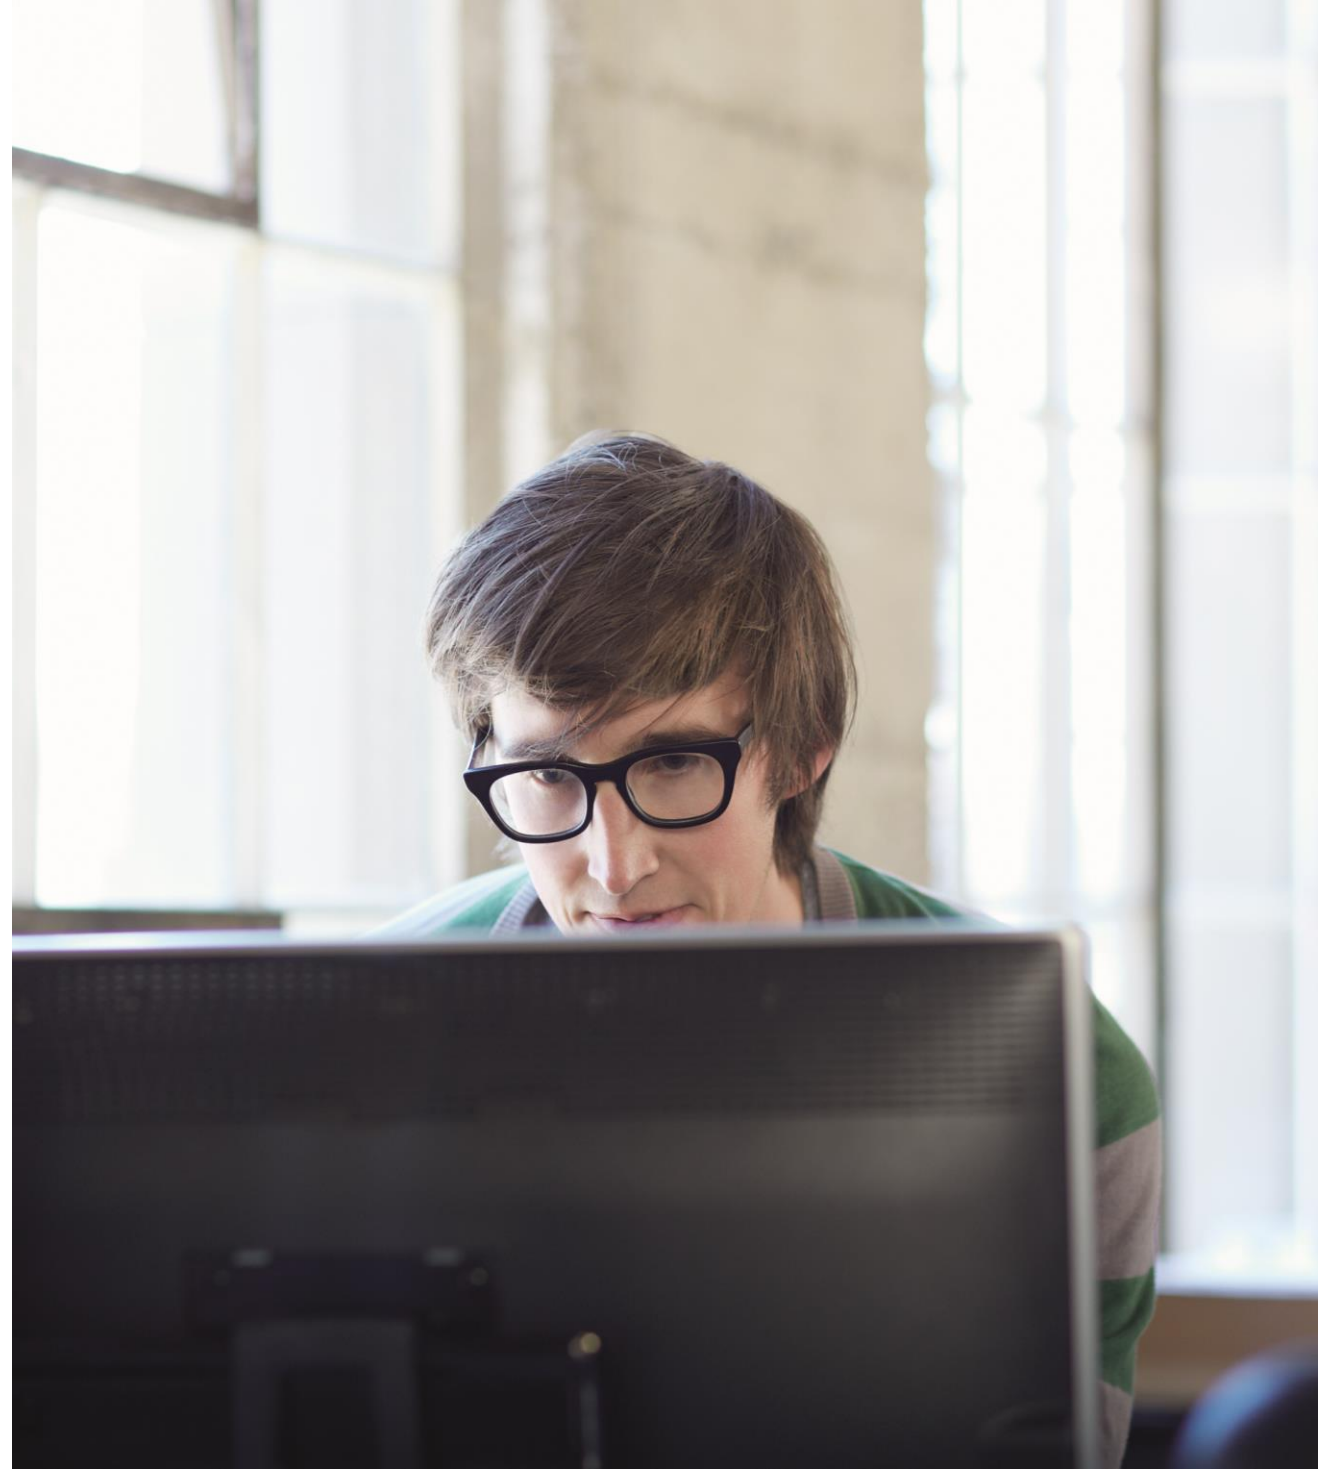

# Microsoft Project reimaged

**Based on extensive customer engagement to understand the true demands of modern work**

**Redesigned from the ground up  
to meet the needs of the future  
state of work management**

**Delivered on the web to enable  
rapid feedback loops and  
improvement**

**Built on the most-trusted and  
secure cloud platform in the  
world: the Microsoft Cloud**

# Trends in modern work

# Our work happens everywhere...

50%

of companies will  
integrate IT PMOs  
into EPMO hubs  
by 2021<sup>1</sup>

80%

of companies will  
have an EPMO  
by 2023<sup>2</sup>

## ...and we need transparency to get the big picture

1. Gartner - [Predicts 2018](#)

2. Gartner - [Predicts 2019](#)

# Our teams choose their own tools...

73%

of companies use  
agile methods for  
managing projects<sup>1</sup>

69%

of companies still  
use predictive  
project  
management<sup>2</sup>

...so they can **work how they want**

# Our teams want simple, visual tools...

50%

of the workforce  
will comprise  
Millennials by 2020<sup>1</sup>

75%

of the workforce  
will comprise  
Millennials by 2025<sup>2</sup>

1. Deloitte – [Adapting to the Future of Work](#)
2. Deloitte – [Big Demands and Big Expectations](#)

...to help them **start fast**

# Our key processes span the enterprise...

79%

of companies need cross-functional collaboration<sup>1</sup>

65%

of large orgs will enable non-IT staff to perform integrations by 2022<sup>2</sup>

## ...and we need to adapt and automate tools

1. Gartner – [2017 Survey Analysis: PPM Leadership](#)
2. Gartner - [Innovation Insight for Hybrid Integration Platforms](#)

# Our work depends on the performance of our infrastructure...

80%

of businesses think  
a cyber attack is  
likely in the coming  
year<sup>1</sup>

97%

of companies will  
use sensitive data  
on digitally  
transformative tech<sup>2</sup>

## ...and we'd rather focus on business, not technology

1. ISACA – [State of Cybersecurity 2018](#)

2. Thales - [2019 Data Threat Report](#)

# Modern work management

**Problem**

Work is happening everywhere all the time—and we end up losing track

**Solution**

Get the big picture: all work, from tasks to portfolios, across multiple services

**Outcome**

Make better decisions

Our teams choose their own tools to work the way they want

Collaborate on projects with flexible methodologies and familiar Microsoft tools

Get more done

Our accidental PMs and Millennials want simple, visual tools for work

Start fast with simple interfaces and modern web experiences

Deliver quicker

Our business processes cut across functions and systems

Run your end-to-end business processes on a single platform

Run your business your way

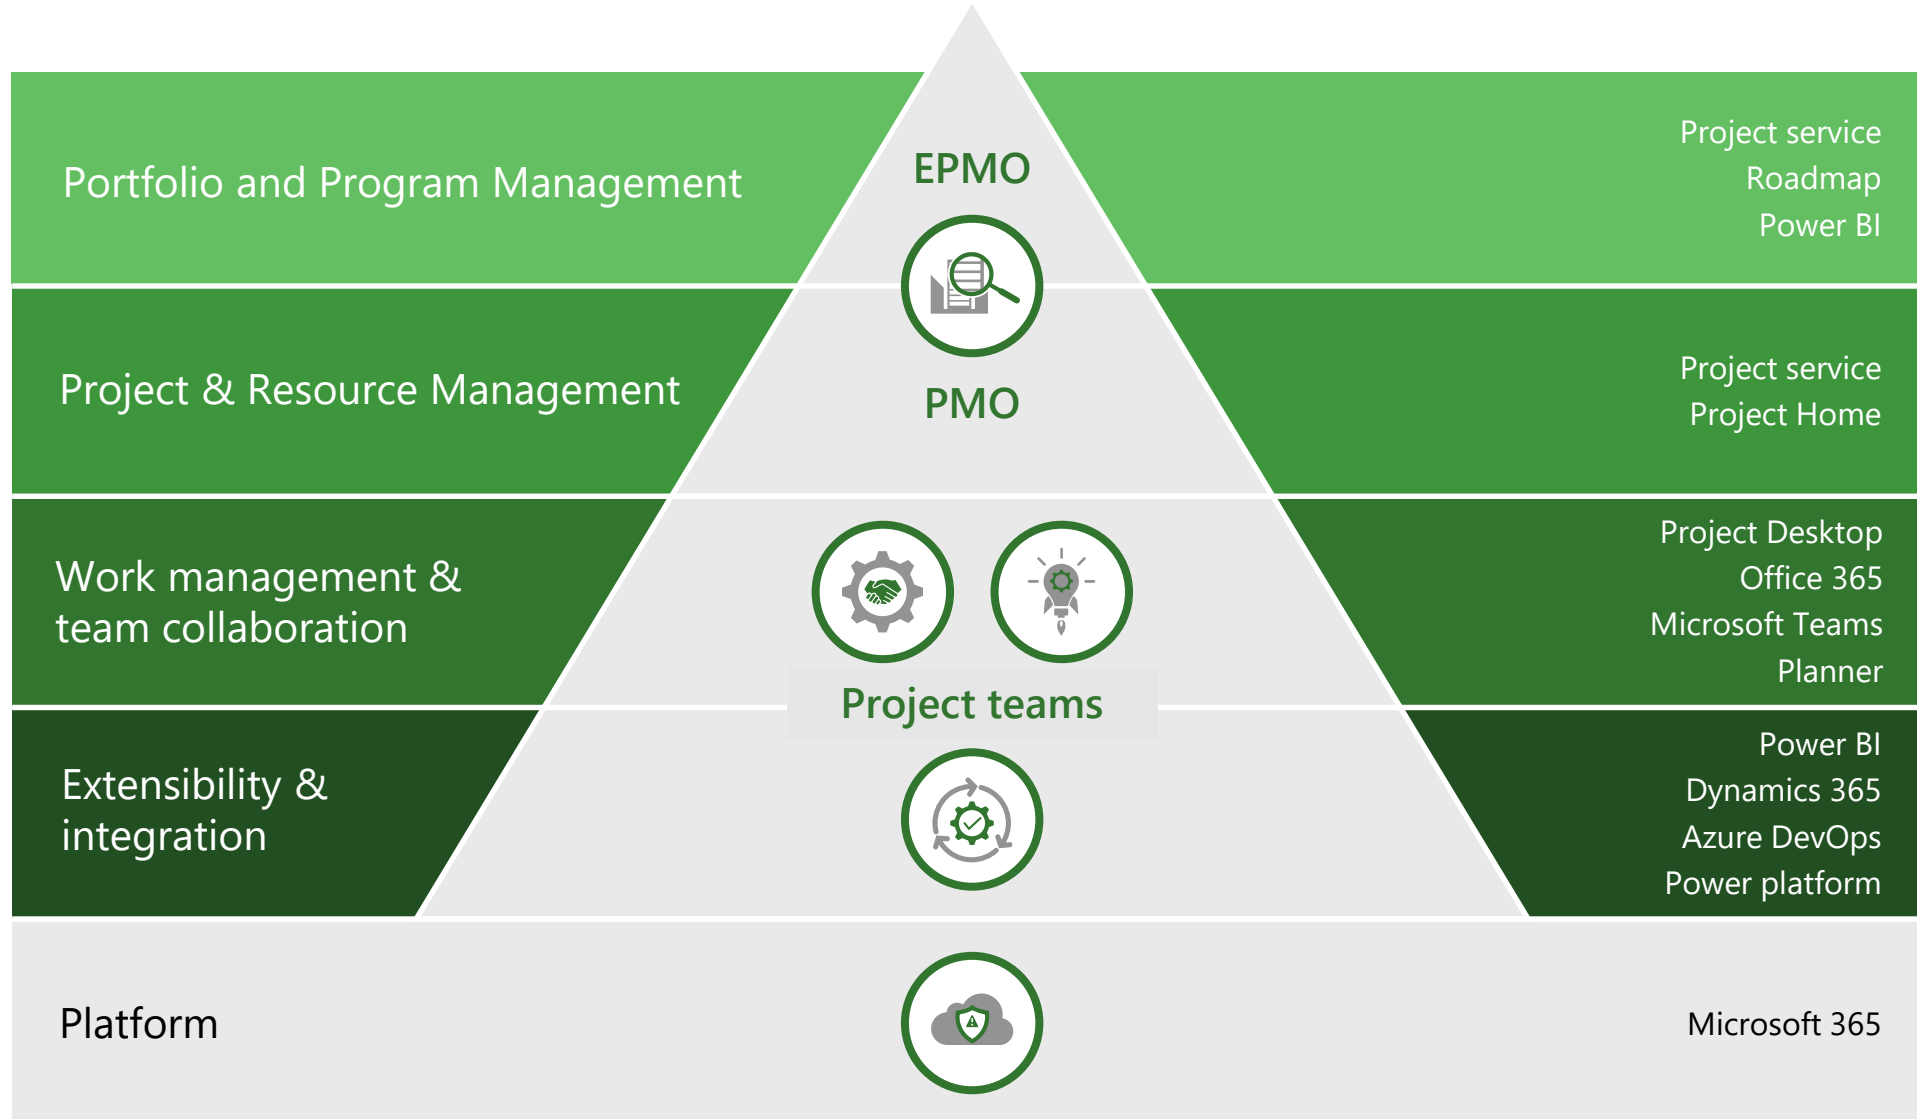

A single compliance, security, or platform issue can disrupt business

Focus on business, not technology with highly compliant, secure, scalable platform

Innovate with confidence

# Modern work management ecosystem: Project + Microsoft 365

# Microsoft work management ecosystem: Functional view

## Better for Business

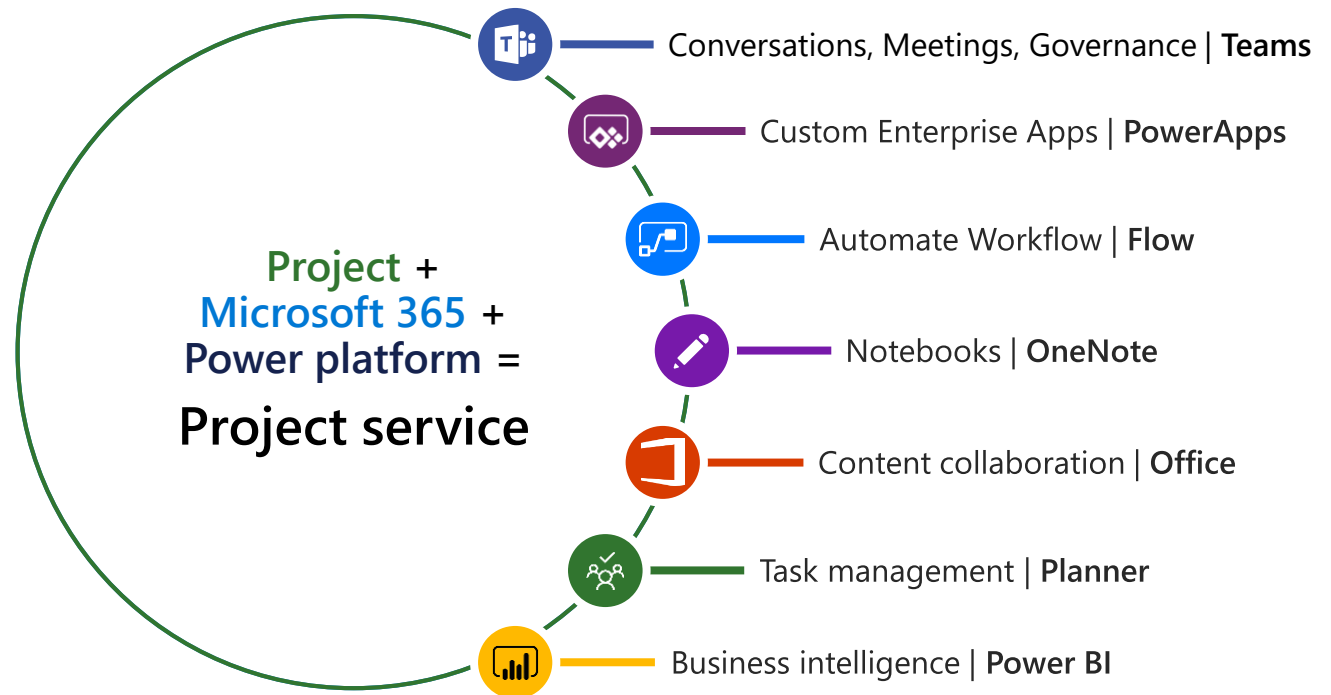

Always up-to-date [features](#) and performance including new [Agile](#) projects and [Power BI Content Pack](#)

Consistent user experience and up to 5 PC installations of desktop apps per user

## Better for IT

Streamlined cloud deployment, maintenance, [security](#), and service manageability aligned to Office 365

Native integration across Office 365 applications and services

# Modern work management vision

Teams work the way they want  
Executives get the results they need

**Microsoft  
Project**

empowers companies to achieve better results by aligning investments with projects and resources, working with agility and flexibility, and collaborating globally—all using intuitive, consistent tools in the Microsoft Cloud.

# Get the big picture

Versatile

Intuitive

Integrated

Compliant

# Get the big picture

A modern PPM solution should help enterprises...

## Align investments to strategy

Identify, select, and deliver project portfolios that best align with business strategy to maximize ROI

## Choose projects objectively

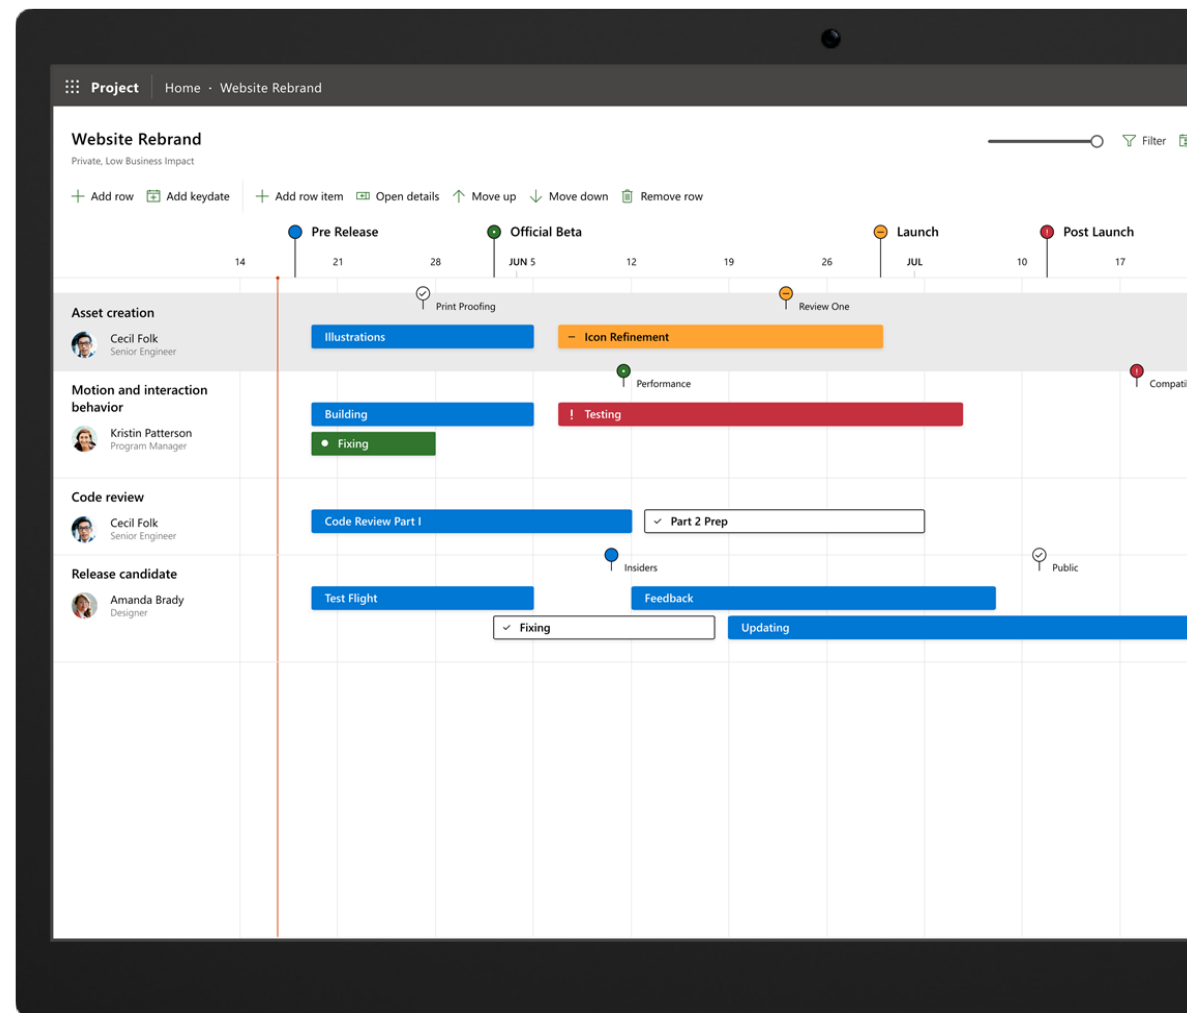

Prioritize project-based sales opportunities with built-in intelligence to plan for successful outcomes

## Monitor progress toward business goals

Monitor progress toward business goals using integrated business intelligence dashboards

## Gain visibility across work

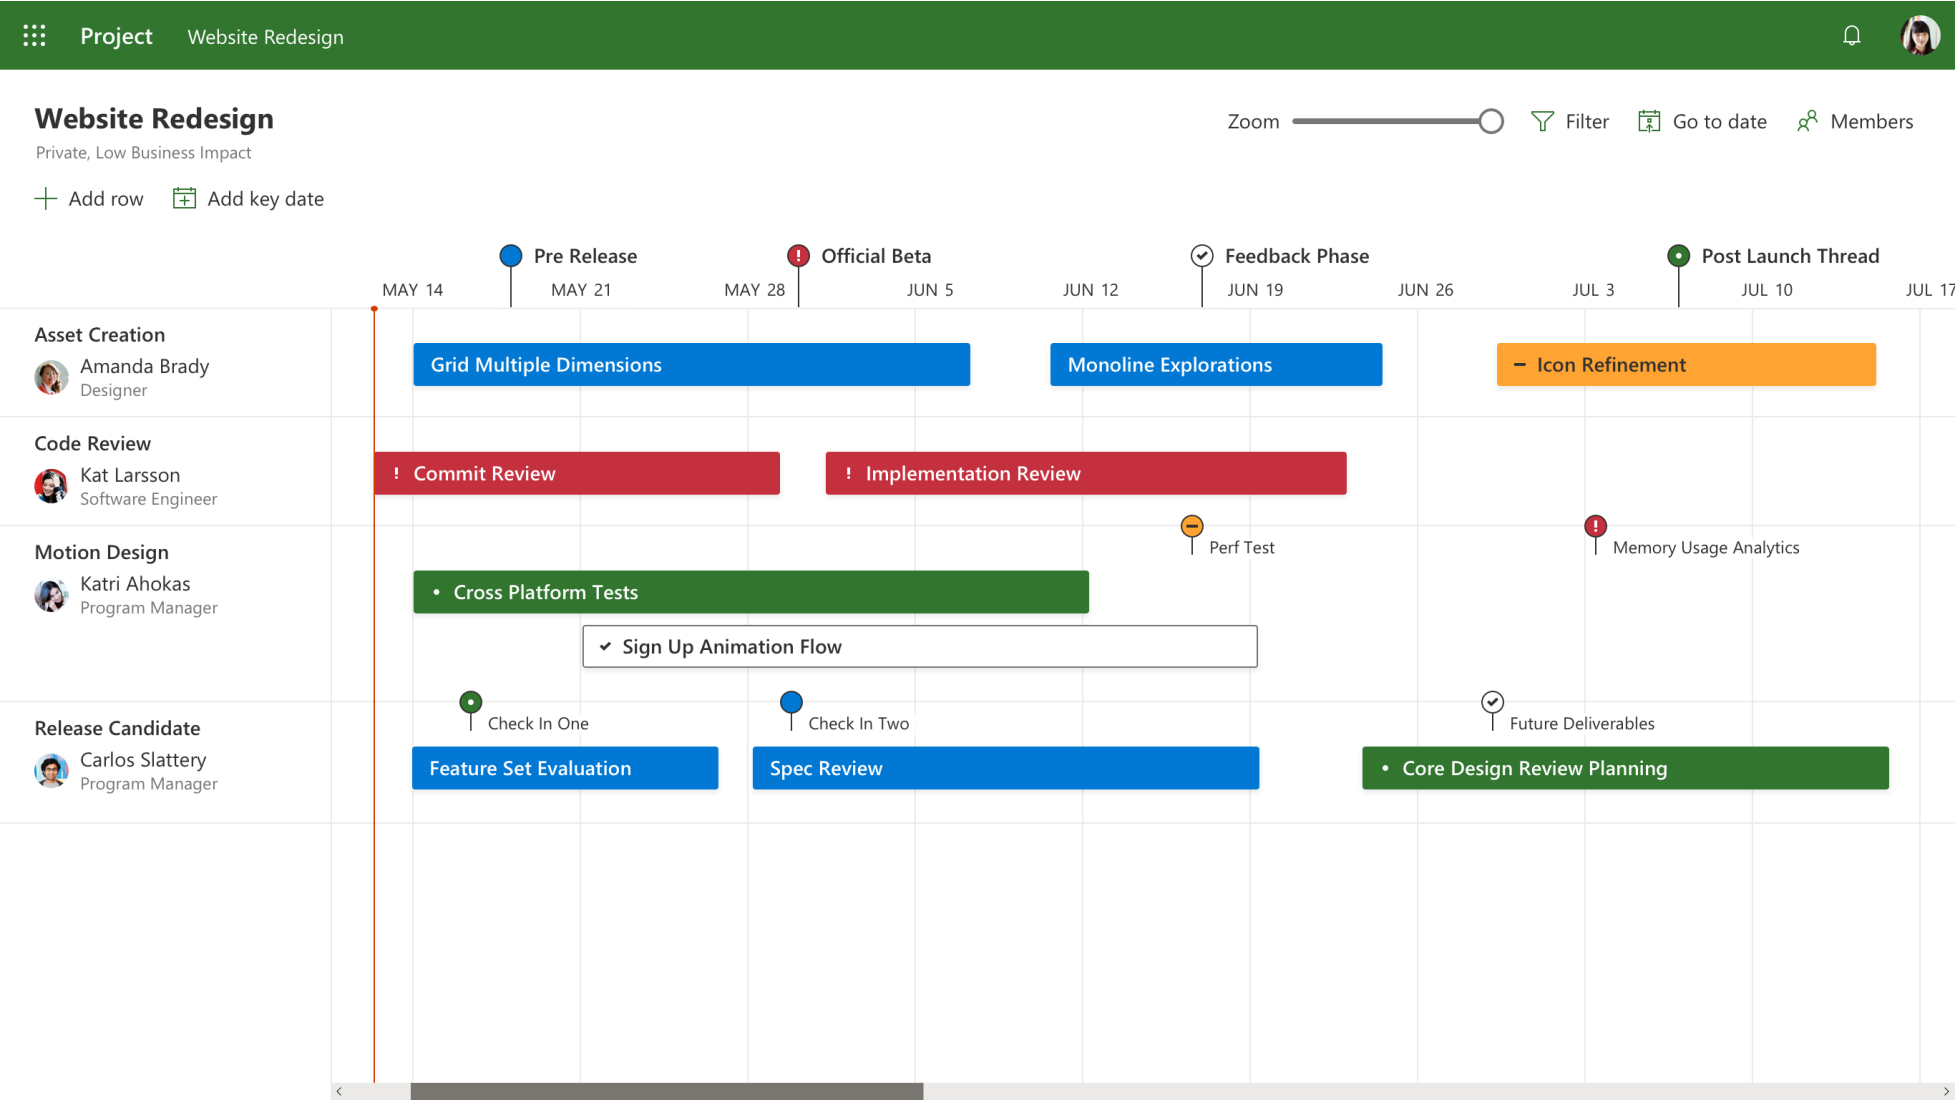

Quickly understand status and investments for all work efforts, from portfolios and programs to projects and tasks

Build visualized roadmaps to see all projects in one place. Learn more about Roadmap [here](#).

# Roadmap

Visualize project tasks in a roadmap view

# Work how you want

Transparent

Versatile

Intuitive

Integrated

Compliant

# Work how you want

A modern PPM solution should help teams...

## Work their way

Manage projects using the team's preferred method, like agile, waterfall, ad hoc, or a hybrid

Use agile task boards to track Scrum sprints, or keep it lean with Kanban-style boards

## Use tools that match their work style

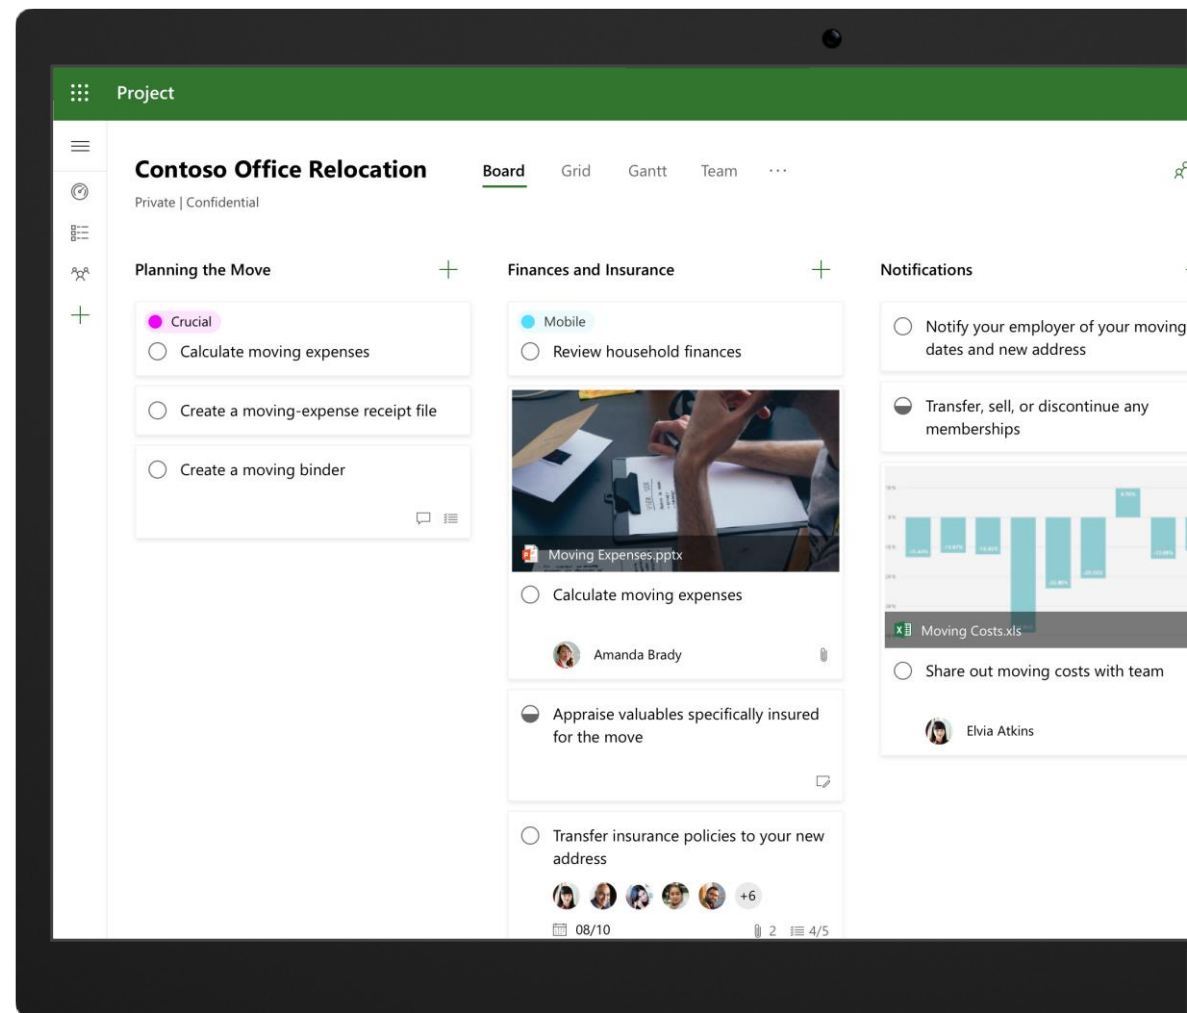

Familiar capabilities and collaboration through native Office 365 tools help eliminate traditional project team silos

## Manage tasks and time from anywhere

Enable teams to report on and own tasks until completion anywhere, anytime, on any device

## Maintain governance

Quickly understand status and investments with built-in governance tools, like workflows

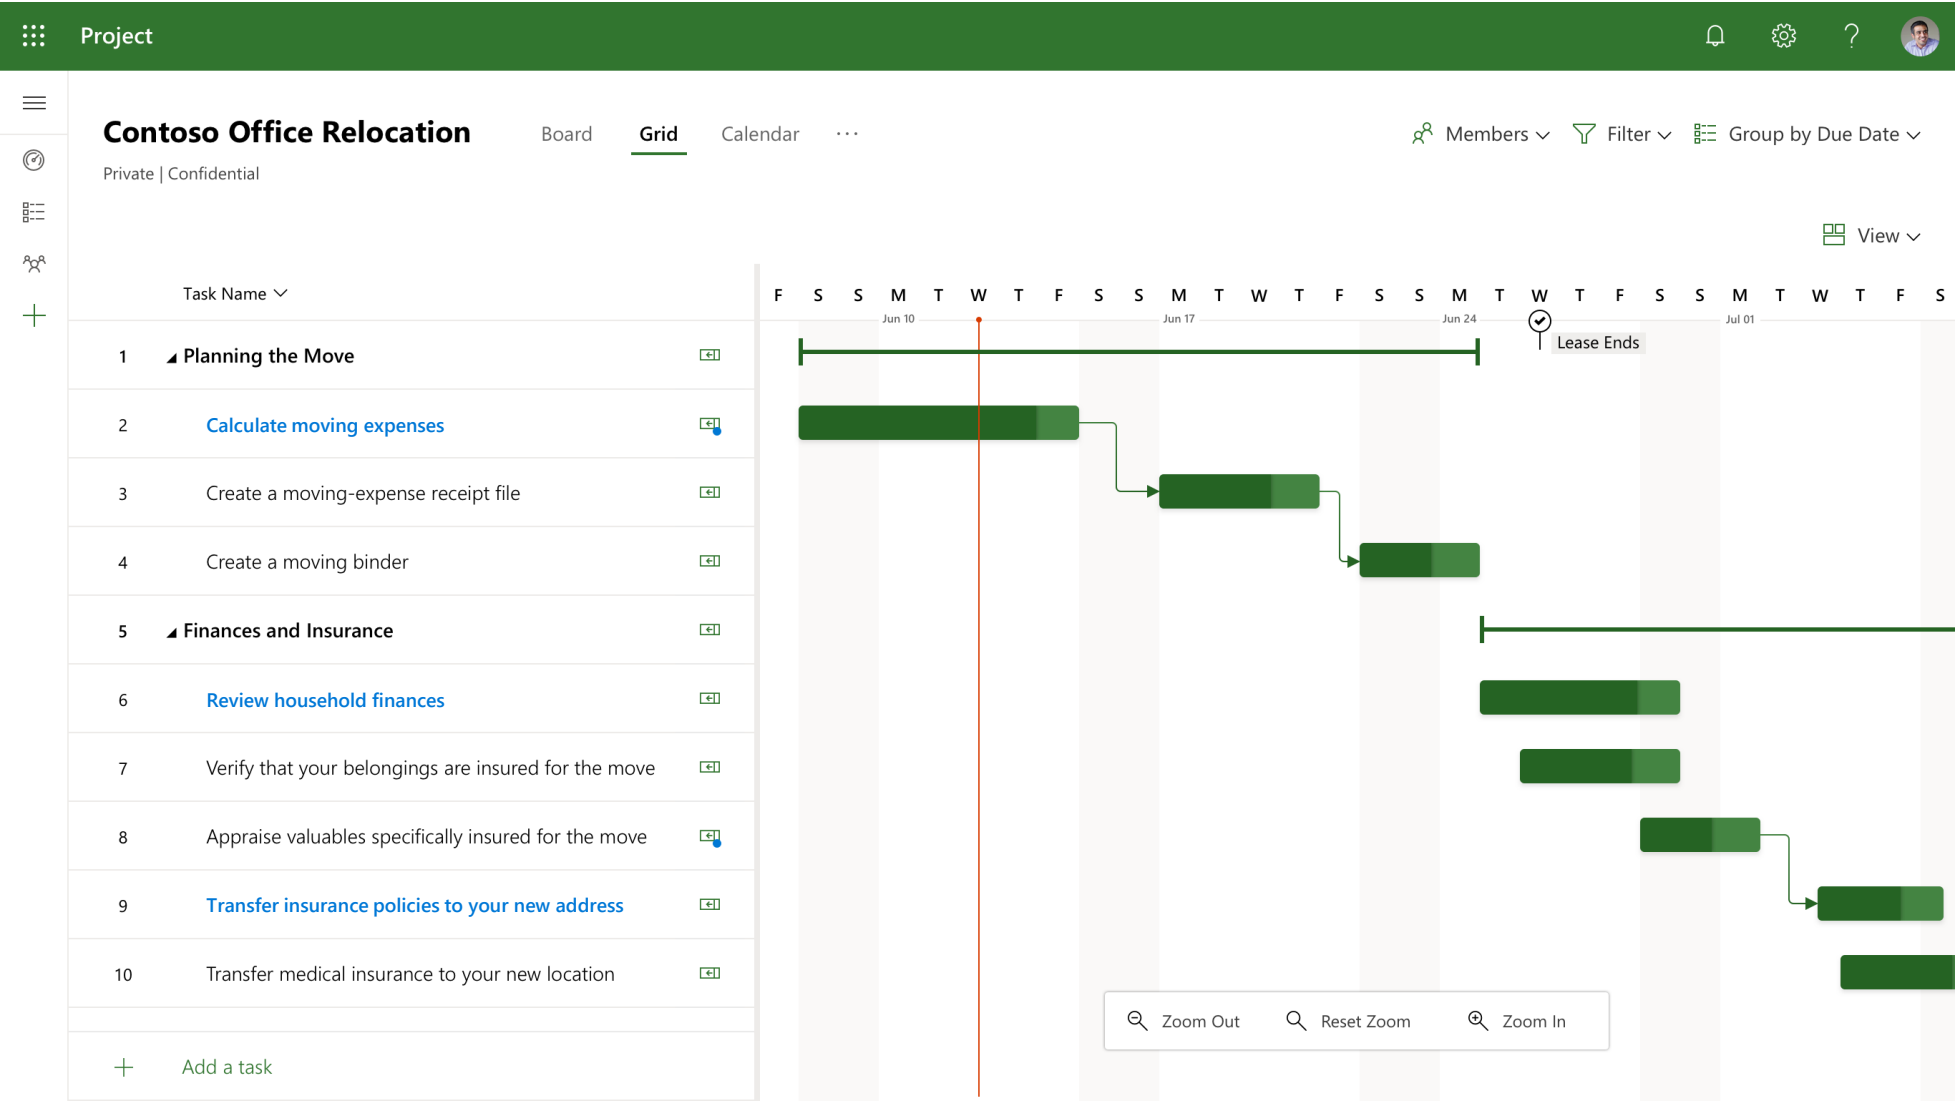

See all your tasks in a simple, Planner-like board. Other views include a grid view and Gantt view.

# Gantt View

Visualize project tasks as traditional Gantt chart bars for a quick look at progress and upcoming deadlines

## Best for...

- Understanding task dependencies
- Getting a quick visual of task status and progress

## Board View

Represent full Project details in a simple, familiar, Planner-like board

### Best for...

- Summarizing status during daily standups
- Organizing tasks into buckets
- Enabling accidental PMs to work more naturally with Project

The screenshot displays the Microsoft Project interface in Board View for a project titled "Contoso Office Relocation". The interface features a green header bar with the "Project" title and navigation icons. Below the header, the project name "Contoso Office Relocation" is prominently displayed, along with its status "Private | Confidential". The view is set to "Board", with other options like "Grid", "Gantt", and "Team" visible. On the right, there are filters for "Members", "Filter", and "Group by Due Date".

The main workspace is divided into three columns, each with a plus icon for expansion:

- Planning the Move:** Contains a "Crucial" task "Calculate moving expenses" and two other tasks: "Create a moving-expense receipt file" and "Create a moving binder".
- Finances and Insurance:** Contains a "Mobile" task "Review household finances" and a task "Calculate moving expenses" associated with a file "Moving Expenses.pptx" and user "Amanda Brady". Below this is a task "Appraise valuables specifically insured for the move". At the bottom, a task "Transfer insurance policies to your new address" is shown with six team member avatars and a date of "08/10".
- Notifications:** Contains two notification tasks: "Notify your employer of your moving dates and new address" and "Transfer, sell, or discontinue any memberships". Below these is a chart titled "Moving Costs.xls" showing a bar chart with values ranging from -17.44% to 5.16%. At the bottom is a task "Share out moving costs with team" associated with user "Elvia Atkins".

A "New bucket" button is located on the right side of the board.

## Grid View

See all project details in one, list-oriented view

### Best for...

- Getting a complete, simple view of all tasks
- Easy, quick editing down task rows

# Focus on business, not technology

A modern PPM solution should help teams...

## Scale automatically

Manage up to 100,000 projects and resources on a single platform while maintaining performance

## Forget about infrastructure

Automatically meet the highest levels of security and compliance requirements

## Work securely

Get enterprise-grade [security](#), [privacy](#), and [transparency](#) through Microsoft 365

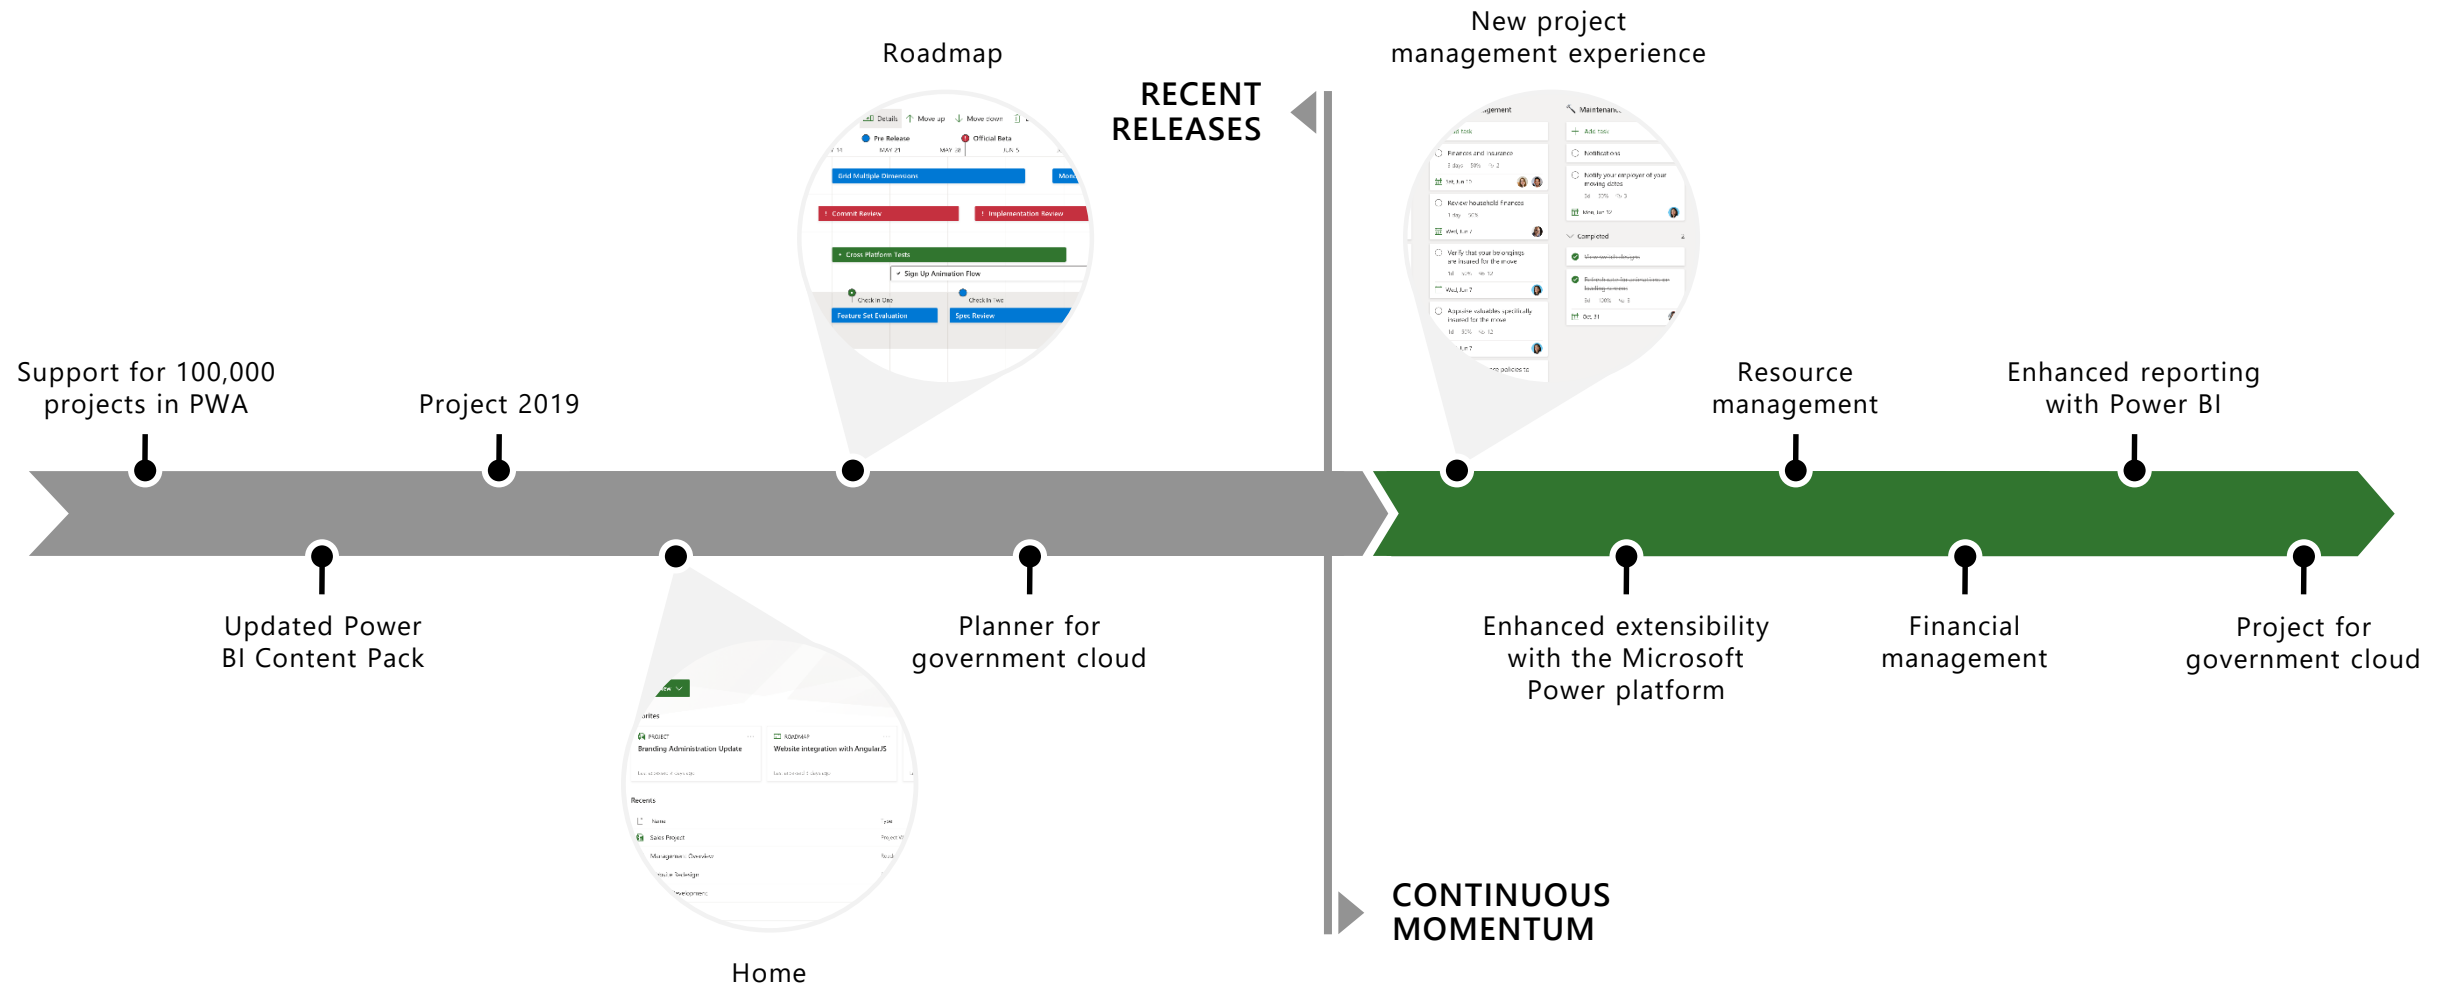

Meet [compliance](#) requirements across industries and regions, including HIPAA, FedRAMP, EU Model Clauses, GDPR, ISO 27001 & ISO 27018, and [more](#)

## Enable all team members

Leverage built-in accessibility features, like Narrator and high-contrast support

# Modern work management continuous momentum

*“With Microsoft Project and Power BI, we’ve saved 160 working hours each month in reporting alone. That’s the equivalent of an additional manager’s entire workload.”*

**Dego Silva Ciarrocchi: Specialist in Social Programs, Itaú Social Foundation**

The Itaú Social Foundation spends US\$35 million each year on development of social programs in Brazil. Parent company Itaú Unibanco is the largest financial conglomerate in the southern hemisphere, employing more than 96,000 workers across the nation.

## SITUATION

Labor-intensive reporting and low project visibility were hampering the foundation’s development times, decreasing the potential for social impact. Itaú Social Foundation needed to automate the reporting process and eliminate redundant work.

## BENEFITS

- ❖ Eliminated 160 hours of monthly redundant work.
- ❖ Increased yearly project portfolio capacity by 30.
- ❖ Vastly improved portfolio and project-specific tracking data.

## WWF Brazil focuses on saving the planet with more efficient project management

*"Using Microsoft Project Online, there is no doubt that we are more effective at our core mission. We have seen a 10 percent increase in productivity since we've put the solution in place."*

Marcelo Brasileiro, CFO, IT Director  
WWF Brazil

Conserving one of the world's most important and biodiverse regions is no small undertaking. With a third of the world's remaining tropical forests, the Amazon helps stabilize local and global climate—and the World Wide Fund For Nature (WWF) has been working for 40 years to protect it. That's why state-of-the art project management and reporting tools are a must. The nonprofit turned to Microsoft Project Online to help the organization replace slow, inefficient, and outdated spreadsheet-based processes so it could focus on its mission to preserve nature, harmonizing human activity with the conservation of biodiversity and the rational use of natural resources, for the benefit of the citizens of today and of future generations.
